

## ZONE 2

# Kabe Combi

High-heel friendly, durable combination mat that can be rolled up, with black, grey or red brushes. The Combi entrance mat is an excellent alternative to the Kabe Original for environments heavily trafficked, for example, by shopping trolleys. The brushes can be replaced or combined with textile and rubber strips. The underside is provided with rubber strips to keep the mat stationary on the surface and dampen the sound of footsteps. Kabe Combi is just as suitable for indoor as for outdoor use.

## TECHNICAL INFORMATION

### KABE COMBI

#### WEIGHT

Approximately 16 kg/m<sup>2</sup>.

#### MAT HEIGHT

Standard approx. 24 mm. Also available in the heights 12 and 18 mm.

#### MAT SIZE

Made to measure, max. size for a single piece 2000 x 1500 mm (A x B). To cover larger areas, the mat is divided into suitably sized sections.

#### PROFILE SEPARATION

Standard distance between profiles, max. 4 mm.

#### ALUMINIUM PROFILES

Natural anodised aluminium alloy, EN AW-6063-T6. Also available in black or gold anodised versions. Stainless steel wire Ø 2.3 mm, jointing.

#### BRUSH STRIP

Bristle-fused strips, bristles symmetrically distributed in dense groups that are fused to the plastic strip. The bristle strips are held in place by rubber end stops. Damaged bristle strips can be replaced easily. Available with brushes in black, light-grey, dark-grey and red.

#### TEXTILE STRIP

Coral Classic or Coral Brush.

#### RUBBER STRIP

Black ribbed rubber strip.

#### ENVIRONMENT

Declared in Byggsvarubedömningen, Sunda Hus.

#### EN 16005:2012

Meets the requirements in EN16005:2012 Kabe Original has a smooth surface and no unevenness. The mats follow the underlying surface and the mats are laid with millimetre alignment, edge to edge.
