

ZONE 2

Kabe Original Serrated

The Kabe Original Serrated is a further development of the Kabe Original with serrated rubber strips for even better scraping capacity and anti-slip protection. According to SP, Technical Research Institute of Sweden, the mat is 13.5% more effective against dirt and grit. The corrugated rubber strips bend easily when trod on and spring back with sufficient force when the pressure is being released to sweep dirt and moisture from shoes by simply walking over the mat. In addition, because the mat is the same on both sides, drainage and run-off are improved by the serrations on the reverse side. Kabe Original Serrated can be rolled up and is 100% recyclable.

TECHNICAL INFORMATION

KABE ORIGINAL SERRATED

WEIGHT

Approximately 12 kg/m².

MAT HEIGHT

Standard 22 mm.

MAT SIZE

Kabe Original Serrated is made to measure in any size. Max. size of a single piece 2000 x 5000 mm (A x B). To cover larger areas, the mat is divided into suitably sized sections. We can produce mats of almost any shape. Provide us with a drawing or template. Under 400 mm for A-dimension, there is an additional set-up cost.

FLAT BARS

Aluminium alloy, EN AW-6005-A-T6.
Dimensions: 12 x 4.5 mm.

RUBBER STRIP

A composition that is especially resistant to extreme temperature variations, EPDM 70° Shore. Dimensions 22 x 3.7 mm.

END PROFILE

U 18 x 18 x 2 mm.

ASSEMBLY

The rubber strips and aluminium bars are riveted together with special rivets. The mat is held together by Ø 2.3 mm stainless steel wire.

SURFACE TREATMENT

Natural aluminium is standard for Kabe Original Serrated but it is also available in gold or black anodised aluminium.

ACCESSORIES

Shopping trolley reinforced, tactile indicators.
