

## Kabe Ramp frames

Angle strip for floor mats or scraper grids in entrances where it is not possible to make a recess in the floor. The ramps minimise the risk of tripping and protect the mat's edges. Mat Ramp Type 1 is installed on the rear/front edge on the Kabe Original and Mat Ramp 2 is laid directly on the floor and can be adjusted to the conditions. The ramp is provided with rubber strips underneath, so it lies stationary and dirt and water are held in place.

### TECHNICAL INFORMATION

#### KABE RAMP FRAMES

##### ALUMINIUM

Natural aluminium alloy  
EN AW 6063-T6.

##### RAMP SIZE

Made to measure, max. profile length is  
one piece, 6000 mm.

##### WEIGHT

Type 1: 0.48 kg/m.  
Type 2: 0.61 kg/m.

##### CONNECTORS

Stainless steel sheet SS 2343.

##### SURFACE TREATMENT

Natural, gold and black anodised.
